Notes for the Transcription of the Bible of Joel Chandler 1740-1800

The birth dates listed on the previous page are for the children of Joel Chandler.

Care must be taken when incorporating these birth dates into family genealogies of the descendants of Joel Chandler 1740-1800.

This Joel is believed to have had sixteen children by two different wives. Only twelve of them are listed here.

Six of his sons are listed in Joel's Last Will and Testament which was witnessed on the 24 Day of March 1800. They were David, Robert, John, Matthew, Thomas, and Henderson Chandler.

The Chandler Family Association DNA Project

<https://www.chandlerfamilyassociation.org/dna-project/>

does research based on Y-DNA testing of direct male line Chandler descendants to determine their genetically-distinct Chandler (GDC) family grouping.

This line of research has determined that Joel's ancestors are part of GDC Group 7A of which his son David's descendants are also a part of. But the research also discovered that descendants of Robert, John, and Matthew are part of GDC Group 34, and an individual who claims descent from son Daniel is a member of GDC Group 8.

An explanation of how this mixture of family lines came to be, is yet to be discovered.
